

```
N = x 'div' length xs
  where
    x = 12
    xs = [1,2,3,4]
```

1.

Error 1: Function N begins with capital letter

Error 2: xs is not on the same indent level as the other variable x

Error 3: div is surrounded by ' instead of `

2.

```
n = x `div` length xs
  where
    x = 12
    xs = [1,2,3,4]
```

3.

3

4.

-- n is a function that divides the first argument with the length of the second argument

```
n = x `div` length xs
  -- In this function x is set to 12 while xs is an array set to [1,2,3,4]
  where
    x = 12
    xs = [1,2,3,4]
```
